Cavitation

20 minutes | 80
30 minutes | 100
40 minutes | 120

Cavitation is body sculpting with no anaesthesia, no scars, no discomfort, no downtime and presents a risk free alternative to liposuction. Cavitation is a natural phenomenon based on low frequency ultrasound. The Ultrasound produces a strong wave of pressure to fat cell membranes. A fat cell membrane cannot withstand this pressure and therefore disintegrates into a liquid state; this is then processed away by the body naturally. The result is natural fat loss.

(A course of treatments are required)

Cryolipolysis

45 minutes | 210

The process freezes the fat cells, the plates on the hand piece drop to a temperature around -5 degrees crystalizing the cells. This exposure causes the fat cells to die without any damage to the overlying skin. The body's normal metabolic processes will gradually eliminate the fat cells from the treated area. Results take longer to be seen, but are effective as part of a course when combined with the Cavitation. 20-40% of fat cells can be lost in the treated area from one application.

(A single treatment is required per area)

3D Dermology

15 minutes | 45
30 minutes | 60

Lymphatic drainage increases blood circulation resulting in the smoothing of cellulite. Beneficial after all 3D Lipo applications to improve the appearance of the skin and even out the appearance of cellulite.

(A course of treatments are required)
